Financial Review.

Revenues and operating expenses

EMGS recorded revenues of USD 1.6 million in the first quarter of 2021, down from USD 11.3 million reported for the corresponding quarter of 2020. Contract and other sales totalled USD 1.5 million, while multi-client sales amounted to USD 0.1 million. For the first quarter of 2020, contract and other revenue totalled USD 11.0 million, while multi-client sales amounted to USD 0.3 million.

Charter hire, fuel and crew expenses totalled USD 41 thousand in the first quarter this year, compared with USD 3.9 million in the first quarter of 2020. The Company did not capitalise any multi-client expenses in the first quarter of 2021, while USD 0.1 million of multi-client expenses was capitalised in the first quarter of 2020. The charter hire, fuel and crew expenses totalled USD 1.3 million in the first quarter of 2021 compared with USD 7.7 million in the first quarter of 2020 when adding back the vessel lease expenses in the first quarter of 2021 and vessel lease expenses and multi-client investments in the first quarter of 2020.

Employee expenses amounted to USD 0.8 million in the first quarter of 2021, down from USD 3.2 million in the same quarter in 2020.

Other operating expenses totalled USD 1.0 million in the first quarter this year, down from USD 1.3 million in the same quarter of 2020 when adding back the office lease expenses.

Depreciation, amortisation and impairment

Depreciation and ordinary amortisation totalled USD 1.1 million in the first quarter of 2021, down from USD 1.5 million in the first quarter of 2020. Depreciation of right-of-use assets, vessel leases and office leases totalled USD 0.9 million in the first quarter of 2021 compared to USD 3.3 million in the first quarter of 2020.

Multi-client amortisation amounted to USD 0.5 million this quarter, compared with USD 1.0 million in the first quarter of 2020. The decrease is a result of some of the multi-client projects with a carrying value in the first quarter last year being fully amortised this year. The Group uses straight-line amortisation for its completed multi-client projects, assigned over the useful lifetime of four years.

No impairment of long-term assets was made in the first quarter of 2021, while USD 5.8 million was impaired in the corresponding quarter in 2020. The impairment in the first quarter of 2020 included impairment of the DeepBlue in the amount of USD 5.0 million and USD 0.8 million impairment to the multi-client library.

The Company had a net increase in cash, excluding restricted cash, of USD 7.9 million during the first quarter of 2021. At 31 March 2021, cash and cash equivalents totalled USD 12.1 million. Pledged Depot deposit (New Facility)

In February 2021, USD 7.3 million held in the Pledge Depot was released due to the expiry of the guarantee it provided security for. Upon release, available cash increased by USD 7.3 million.

Contract Awarded

In March 2021, Electromagnetic Geoservices ASA was awarded a 3D CSEM contract in Southeast Asia. The expected contract value is between USD 6.0 and 7.0 million.

Subsequent events

Completion of multi-client project in Mexico

At the end of April 2021, EMGS completed the fully funded multi-client survey in Mexico.

Share information

EMGS was listed at the Oslo Stock Exchange in March 2007. During the first quarter 2021, the EMGS share was traded between NOK 1.15 and NOK 2.56 per share. The last closing price before 31 March 2021 was NOK1.99.

As of 31 March 2021, the Company had a total of 130,969,690 shares outstanding.

Risks and uncertainty factors

EMGS is subject to a number of risk factors, of which the most important is the demand for EM services. Historically, the demand for EM services has been correlated to the oil price, which can be volatile, unpredictable and is subject to upward and downward pressure from economic, environmental, political, and other factors. The Company expects that this correlation will remain going forward. As EM is still considered a niche product to many E&P companies, demand can quickly change as a response to declining oil price.

The Company's convertible bond loan due in 2023 contains a financial covenant requiring free cash and cash equivalents of at least USD 2.5 million. As of 31 March 2021, the free cash and cash equivalents totalled USD 12.1 million.

2020 was a challenging year for the Company with focus on, and main risks related to, successful cost cutting and liquidity preservation. In 2021, the focus will be sales and project execution, but with the added risks and complexity related to conducting operations during a pandemic. The first project in Mexico, subsequent to mobilising the vessel from cold-stack, was successfully completed ahead of schedule prior to the end of April 2021.

Reference is made to the 2020 Annual Report for a further description of other relevant risk factors.

Outlook

Although the market outlook for oil services is improving and the oil price has stabilized above 60 dollars, the exploration market, and therefore the demand for CSEM services, remains soft. We expect that the demand for CSEM services will slowly improve as the world starts opening again and the activity in oil and gas exploration picks up.

In 2021, the Company is dependent upon keeping the Atlantic Guardian in operation on a series of already secured projects and contracts, as well as securing additional late sales and/or acquisition projects.

The Company continues to have a strong focus on keeping operational costs as low as possible and taking advantage of a more flexible business model. The Company may decide to temporarily cold-stack the Atlantic Guardian during Q4 should it fail to secure sufficient backlog for Q4 2021 and Q1 2022.

In the longer term, the Company believes that its unique CSEM technology could play an important role in the exploration for marine minerals offshore Norway and internationally. CSEM technology can be used to detect the presence of marine mineral deposits (primarily Seabed Massive Sulphides) and EMGS believes that the technology can also be used to estimate the mineral content of such deposits. The Company is undertaking early-stage initiatives to position itself in this future market.

The Company maintains its cutting-edge technological position in the EM market and is well-positioned to be able to capitalise on the expected upturn in the market with a more streamlined and efficient organisation.

Definitions – Alternative Performance Measures.

EMGS' financial information is prepared in accordance with IFRS. In addition, EMGS provides alternative performance measures to enhance the understanding of EMGS' performance. The alternative performance measures presented by EMGS may be determined or calculated differently by other companies.

EBITDA

EBITDA means Earnings before interest, taxes, amortisation, depreciation and impairments. EMGS uses EBITDA because it is useful when evaluating operating profitability as it excludes amortisation, depreciation and impairments related to investments that occurred in the past. Also, the measure is useful when comparing the Company's performance to other companies.

Adjusted EBITDA

Adjusted EBITDA means EBITDA (see above) less multi-client investment (capitalisation) and less the cost of vessel and office lease. EMGS uses adjusted EBITDA because the Company believes this provides users of the financial reporting with a clearer picture when evaluating the operating profitability regardless if the Company is working on a multi-client or a proprietary survey. The adjusted EBITDA includes the gross cash costs of the Company. The adjusted EBITDA adds back cash items as capitalised multi-client expenses and vessel and office lease expenses to the costs included in the adjusted EBITDA.

Backlog

Backlog is defined as the total nominal value of future revenue from signed customer contracts. EMGS believes that the backlog figure is a useful measure in that it provides an indication of the amount of committed activity in the coming periods.
